

TRUE NORTH LEARNING

Leaders in Experiential Learning

presents

THE EIGHT PILLARS OF ORGANISATIONAL HEALTH

These workshops provide a learning forum where leaders and senior managers can develop their skills and knowledge in building capacity in the Eight Pillars of Organisational Health.

What it is

'The Eight Pillars of Organisational Health' is a series of 8 two-hour breakfast workshops. Each workshop will focus on one of the 8 pillars and will consist of an experiential learning activity and debrief, collaborative coaching and the opportunity to network with other managers and leaders who are building healthier and more effective organisations.

Organisational Health is based on a particular strategic & philosophical approach to business. Healthy organisations have a systemic and holistic approach to organisational development, change and challenges that enables them to address the challenges they encounter through a multi-focal and long-term approach. This results in a competitive advantage in terms of how they address short-term performance challenges as well as long-term viability issues.

About True North Learning

True North Learning is a world leader in Experiential Learning, delivering practical outcomes that build business. Our purpose is to develop workplace environments that motivate, empower and build capacity within people and teams.

We specialise in creating Experiential Learning programs that incorporate activities and simulations to identify performance gaps and generate problem-solving strategies around these.

Through this we create leaders and transform teams, building skills and engagement in alignment with your organisational goals.

Experiential Learning has been delivering knowledge through direct experience for more than two decades and is part of the Behavioural Sciences evolution that is driving excellence in business today.
